## SECURE YOUR INFRASTRUCTURE

**LDAP, RADIUS, and SSH  
Key Management in the Cloud**

## What Does **Foxpass Do**

### **LDAP & RADIUS** in the Cloud

- 1 Full G Suite, Office 365, Okta, etc. integration
- 1 Sync with your main directory to simplify onboarding and offboarding
- 1 Delegate authentication to your main directory for SSO across your entire infrastructure
- 1 Help secure access to your Wi-Fi, machines, and VPN
- 1 Manage group memberships and user attributes
- 1 Segment host access by user or group
- 1 Pull or stream LDAP and RADIUS logs

### **Access Control**

- 1 Easily define which engineers can log into which machines
- 1 Grant access on a permanent or temporary basis
- 1 Modify sudo permissions with ease

### **SSH Key Management**

- 1 Self-service management of SSH keys
- 1 Set SSH key encryption requirements
- 1 Enforce SSH key and password rotation
- 1 Easy-to-use interface
- 1 Set SSH key length requirements

# FOXPASS

www.foxpass.com

**CLOUD**

Cloud: All companies who want to secure their stack, both physical and virtual

**ON PREM**

On premise: Compliance officers concerned about HIPAA or PCI

## WHY ORGS USE FOXPASS + SSO

Why orgs use Foxpass  
in addition to their SSO/SAML provider:

**Authentication  
on Wi-Fi Networks**

**VPN**

**LDAP  
clients**

**Authentication  
on devices**

*Automate your provisioning with automatic sync  
between Foxpass and your main directory*

100,000+ Employees are managed by Foxpass
